Webpresence premium is a **Semi-Custom** package i.e. it is not a website built from scratch to suit the client's needs. It is built on a platform that comes with the above-mentioned features and the package has pre-defined benefits. However, the multiple template designs can be customized with your logo, brand colour, photos and other content. Other modules such as photo gallery, online forms, file manager and online store are optional.

A **Full-Custom** website is a site developed from scratch to finish specifically for you. The layout and design will be unique to you and it will be determined 100% by your needs and desires. If your brand/business requires a Full-Custom website, the charge starts from N500, 000 and above.

## **GET WEBPRESENCE**

You can choose from ten available design templates. Each template can be customized with your logo, brand colour, photos and other content. Modules can also be added to any template you choose.

Choose your preferred design template from these:
